01

Challenges

Scenario Challenge

Pain points

1. Property loss

Inadequate coverage and the lack of round-the-clock physical security directly contribute to property loss and preventable theft

2. Delayed detection

Security personnel frequently overlook intrusions, leading to delayed response times

3. Prolonged response time

Delayed and inadequate responses to suspicious activity in the park can exacerbate safety risks

02

Solution Benefits

Benefits of AI-powered Surveillance

Our AI-powered surveillance solution unifies continuous 24/7 monitoring, real-time threat detection, and rapid video retrieval. By eliminating blind spots and accelerating response times, it elevates both security standards and operational efficiency across industrial parks.

24/7 Complete Monitoring

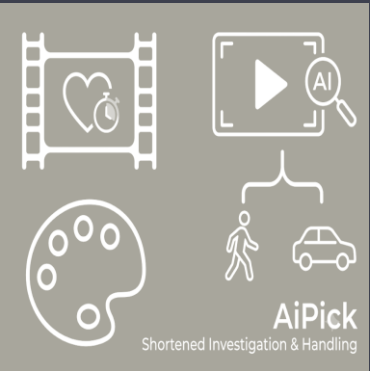

24/7 continuous video recording covers key areas(corridors, lobbies, production zones ,etc) with detailed, uninterrupted footage, effectively eliminating security blind spots in the entire park

Real-time Detection & Alarm

AI cameras automatically identify high-risk events (e.g., warehouse intrusions, unauthorized access to restricted areas) and send real-time notifications to security personnel, ensuring timely intervention to prevent potential losses

Instant Retrieval for Quick Action

AiPick technology enables one-click efficient video retrieval, shortening the time for inprocess and post-event investigations and supporting immediate follow-up actions(e.g, evidence confirmation. incident handing)

03

Product list and Topology

01

AiPick Camera

The new 4MP/8MP/12MP Ai-Pick quickly and accurately identifies humans and vehicles via feature analysis

02

Pro/Ultra NVR

Unleash high-efficiency tracking across vast dynamic environments with AiPick, leveraging front-and-back-end synergy for instant multi-channel video search

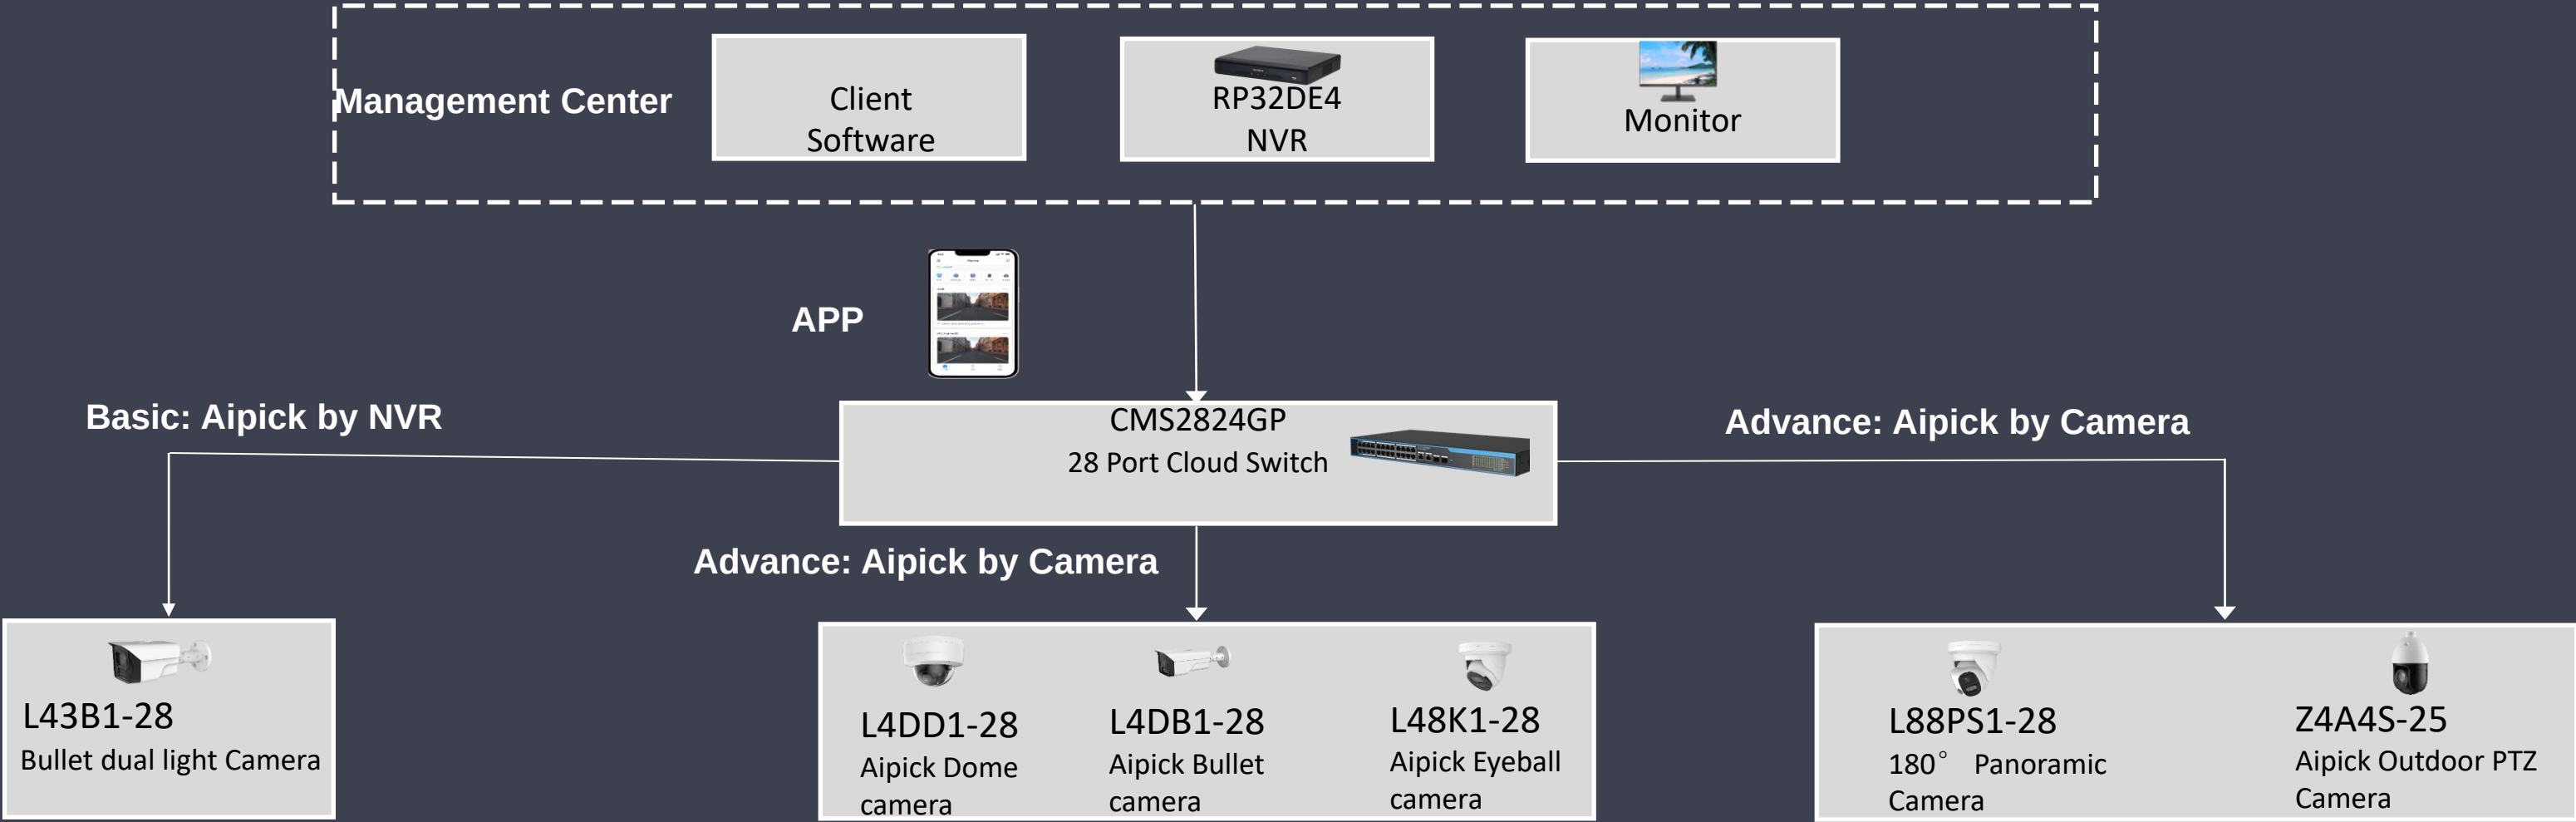

03

System Topology

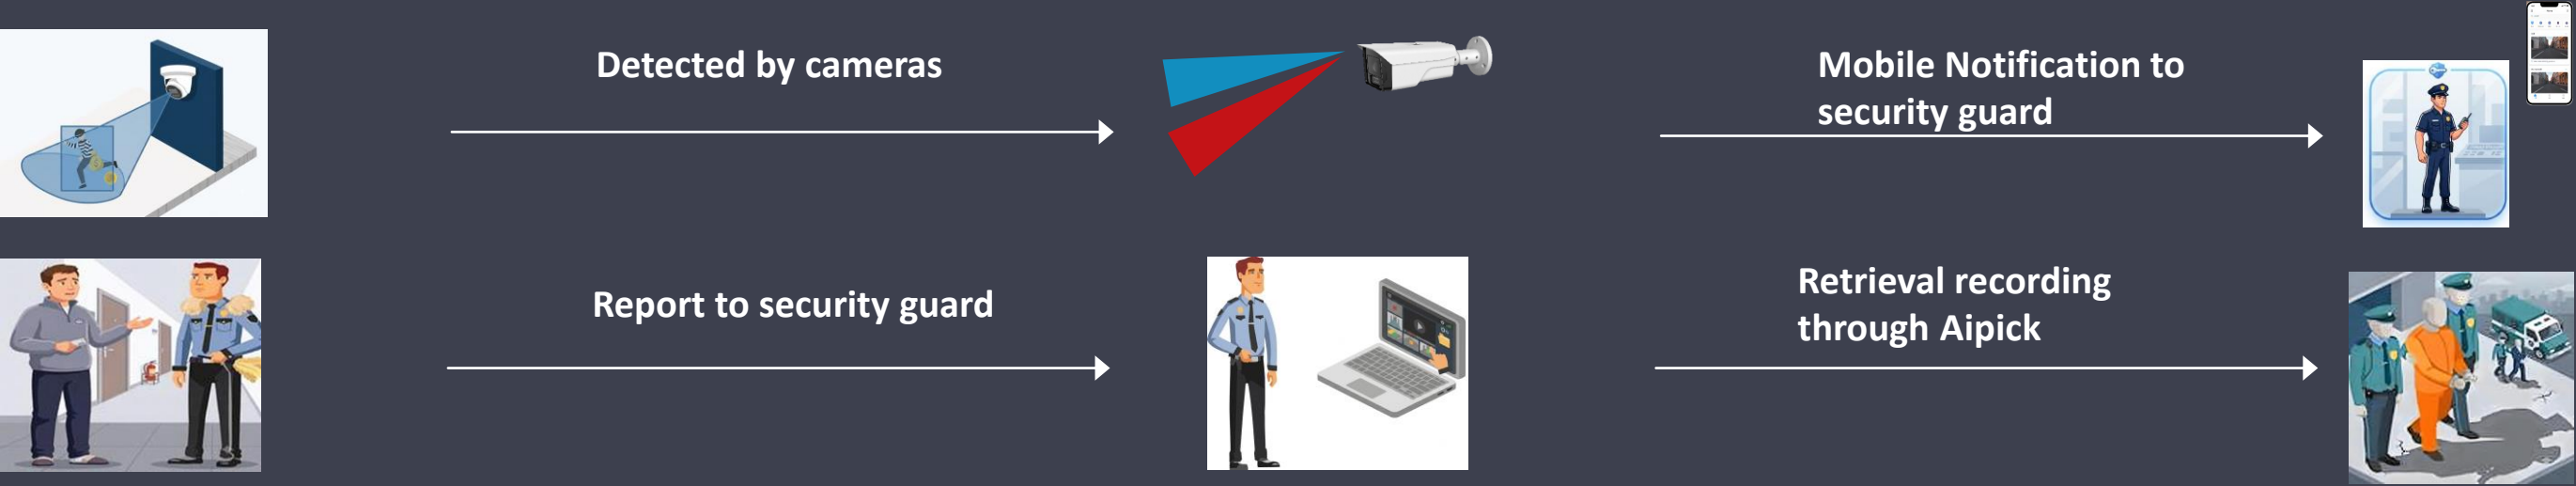

Present the complete system topology—from terminal devices to the central platform—and the selection of devices.

Aipick Solution Topology& Operational Flow

1.VERTICAL SYSTEM TOPOLOGY

2.WORK FLOW

Business Value Propositions & Advantages

Accurate AI-powered detection

- **99% accuracy** of human/vehicle intrusion detection
- Eliminates false alarms triggered by leaves pets, changes in light, rain, etc., reducing **false alarm rate to <1%**

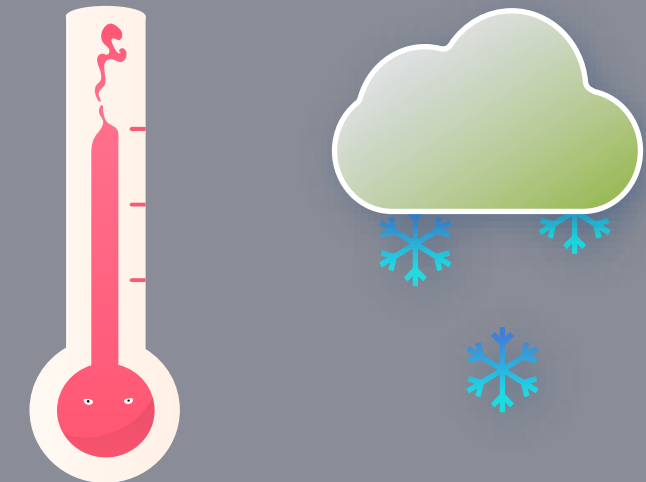

Colorful video and Aipick

- **Colorful video 24/7 with big sensor**, white light and AI SSA
- **Quick response in seconds** when retrieving records with Aipick

Durable and Reliable

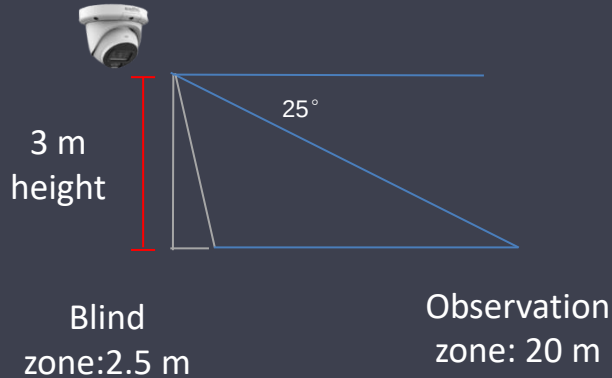

- IP67 protection rating(dustproof and waterproof), with metal body
- Adapts to extreme environments, with a wide working temperature rage

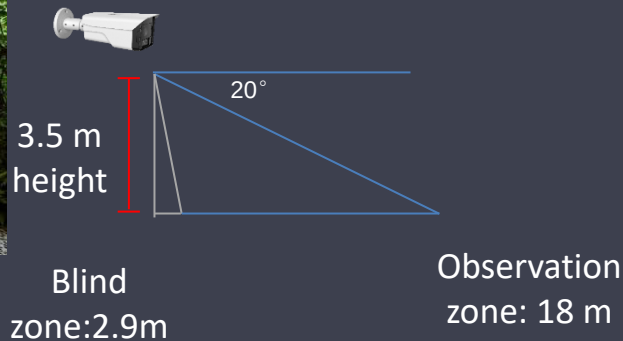

Deployment

Step 1: Hardware Installation

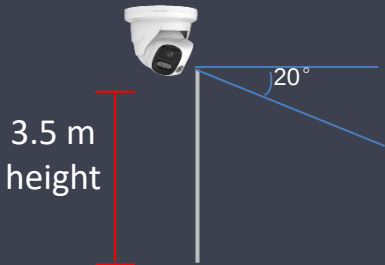

1. Corridor

2. Lobby

3. Open field

4. Parking area

5. Office

Step 2: Software Parameter Setup

1. Using Aipick in Playback

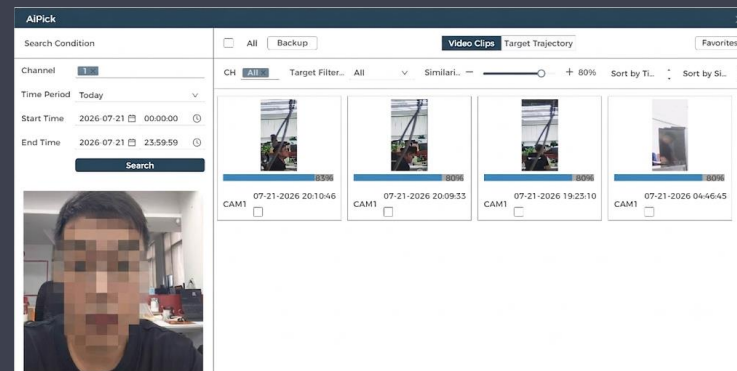

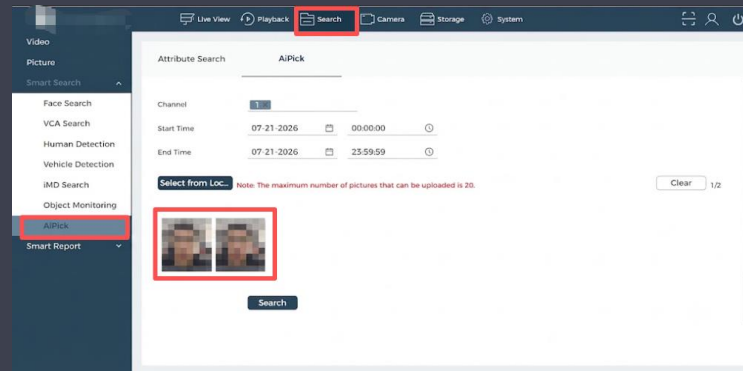

By drawing a region, the relevant video clips of people and vehicles approaching the area **from the same camera** will be found.

Deployment

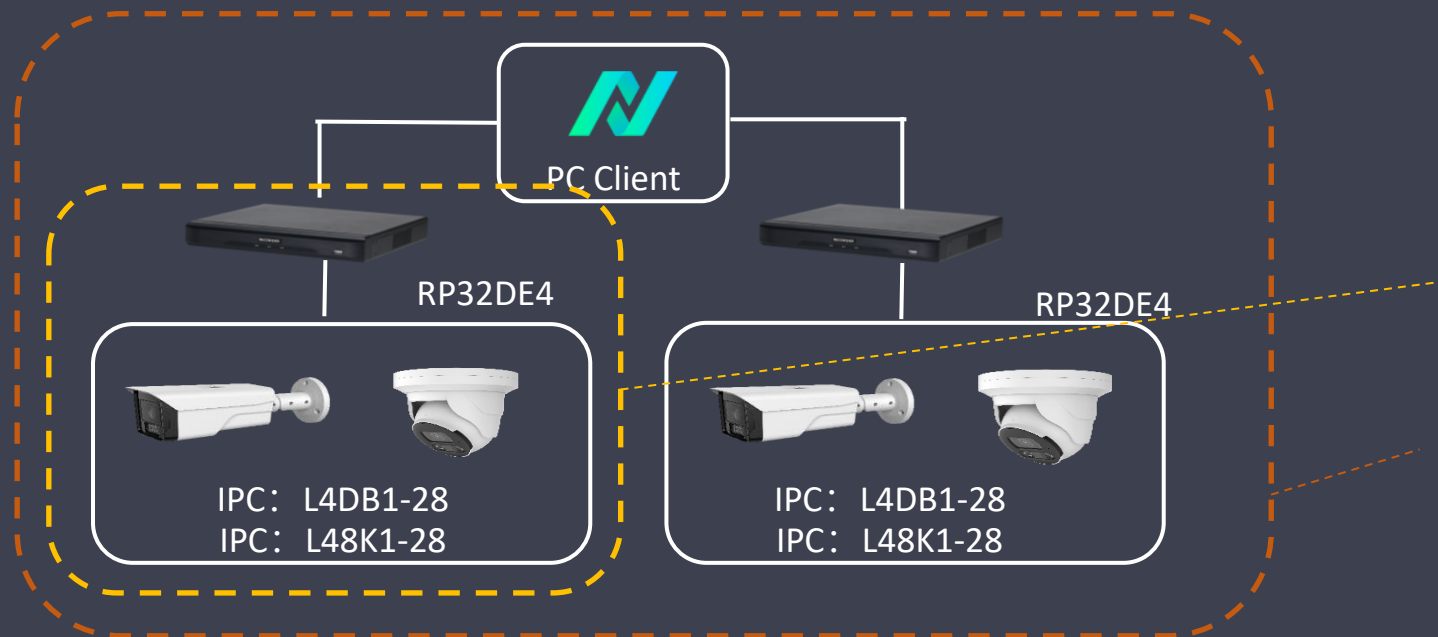

Step 2: Software Parameter Setup

2. Using Aipick in Smartsearch

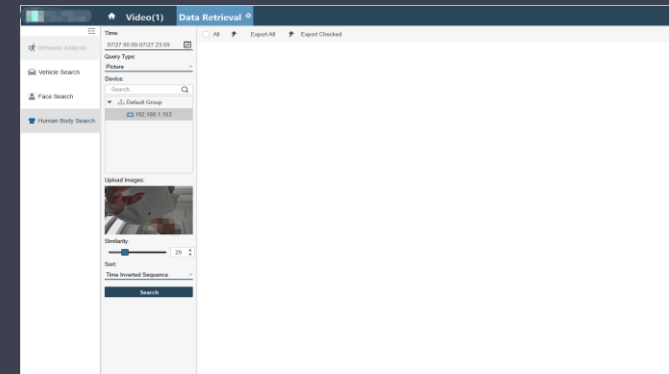

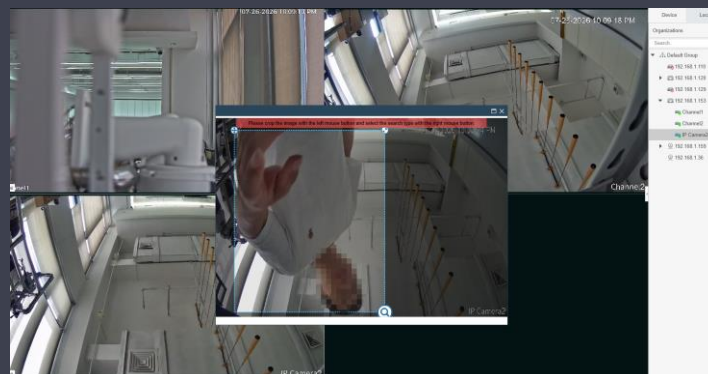

By selecting suspicious behavior, video clips from other cameras (Aipick-supported) can be found within seconds.

3. Using Aipick in PC Client

AiPick on NVR:
Searching for relevant recordings from all cameras within the same NVR.

AiPick on Lumiviewer:
Searching for relevant videos from AiPick cameras of NVR.

AiPick implements intelligent retrieval of target humans and vehicles across spatiotemporal dimensions to generate chains of evidence.

Product List

Basic				Advanced			
Category	Model	Description	Image	Category	Model	Description	Image
Camera	L43B1-28	4MP Smart Dual Light Fixed-focal Bullet Network Camera		PTZ Camera (AiPick)	Z4A4S-25	4MP 4-inch Network PTZ, IR, 25x Optical Zoom	
	CAJ-B01	Water-proof Junction Box			CAB-W02+CAJ-B06	Wall Mount Bracket	
	GAJ-White	Water Joint		IPC (AiPick)	L4DD1-28	4MP Smart Dual Light Network Dome Camera, 2.8mm	
Transmission	CMS2824GP	26-Port Cloud Managed Desktop Switch with 24-Port POE			CAB-W01	Wall Mount Bracket	
	N/A	UTP CAT6 Cable			CAB-W01+CAB-P01	Pole Mount Bracket	
Management Center	RP32DE4	32 Channel 1.5U Pro AI Network Video Recorder		IPC (AiPick)	L4DB1-28	4MP Dual Light Fixed-focal Bullet Network Camera	
	N/A	6TB/5400RPM/256M/SATA 6Gb/s/Seagate Standard SkyHawk			CAJ-B01+CAB-P01	Pole Mount Bracket	
	N/A	FHD Monitor			CAJ-B01	Wall mount Bracket	
	Neoviewer	APP/PC Client		Deterrence IPC (AiPick)	L48K1-28	4MP Smart Dual Illumination Active Deterrence Fixed-focal Turret Network Camera	
					CAJ-B05	Junction Box	
					CAB-W05	Wall mount bracket	
				180° Panoramic Camera	L88PS1-28	2*4MP Full-color Fixed-focal Warm LED Turret Network Camera	
					CAJ-B05	Junction Box	
					CAB-W05+CAB-P01	Pole Mount Bracket	
				Transmission	CMS2824GP	26-Port Cloud Managed Desktop Switch with 24-Port POE	
					N/A	UTP CAT6 Cable	
				Management Center	RP32DE4	32 Channel 1.5U Pro AI Network Video Recorder	
					N/A	6TB/5400RPM/256M/SATA 6Gb/s/Seagate Standard SkyHawk	
					N/A	FHD Monitor	
					Neoviewer	APP/PC Client

Successful Cases

Successful Cases

A Factory Project

Before replacing the surveillance system with Aipick cameras, the entire garment factory was using an analog CCTV surveillance system. There were cases where whole boxes of clothes were lost inside the factory, and it was difficult for the factory owner to find the person who stole the clothes from the video footage. Such incidents were often left unsettled. After replacing the analog cameras with Aipick solution, the clothes thefts disappeared completely due to the deterrent effect of AI intelligent search function. The owner is very satisfied.

Furniture Mall Project

Children often get lost in a furniture mall. Due to the complex layout of the mall, it was not easy to find them. After learning about the AiPick feature, the owner of the furniture mall replaced all 80 cameras with AiPick cameras. With the upgrade, security personnel can locate all relevant video clips from the cameras within minutes. This helps customers find their children. As a result, the furniture mall has received positive feedback from many of its family customers and its repeat purchase rate has increased even further.
